

How to Choose a Composite

Speaker: Dr David Lovridge

Presentation Length: 30 minute

It will look at what properties in a composite that a dentist should know before being able to decide if the composite will satisfy the requirements he/she has.

The lecture will discuss the difference between a microfill and a hybrid and when each is to be used.

What Wedge and Where

Speaker: Dr David Lovridge

Presentation Length: 30 minute

There are many different wedges - none are perfect but all can be useful in different situations.

Outcome of this is a dentist will be able to decide which wedge is needed for different restorations to be able to avoid overhangs and deficiencies in our composites.

Minimally Invasive, Maximally Aesthetic

Speaker: Dr Clarence Tam HBS, DDS

Presentation Length: 30 minute

Clarence will guide you through a scintillating journey of cases and techniques guided by the principle of Minimally Invasive, Maximally Esthetic cosmetic dentistry. He will focus on direct composite restorations featuring a new, never-before seen "breath-by-breath" treatise of a dual maxillary central incisor case involving severe hypoplasia.
